GS1500 RESPIRATOR DRYER

The GS1500 Respirator Dryer is ideal for rapidly drying respirators and other personal safety equipment. An electronically controlled heated airflow ensures proper temperatures are maintained throughout the cycle. Air is filtered via a carbon air filter prior to entering the cabinet. This all stainless steel unit will accommodate six GS2102 baskets. The safest and fastest method available for respirator drying.

- Temperature and time settings are user adjusted.
- Easy to operate
- Holds forty-eight full face masks or ninety-six half masks
- Filters incoming air

User adjusted temperature and cycle time

Replaceable carbon air filter element

The GS1500 comes with six GS2102 Baskets
